SUMMARY

Computer and Communication Engineering student focused on web, network and IoT security. Hands-on experience with penetration testing, OWASP Top 10 research and Python automation. Project work spans log integrity, explainable investigation workflows and Linux/container configuration auditing.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML, CSS, SQL

Security: Burp Suite, Nmap, Wireshark, OWASP Top 10, vulnerability assessment, Metasploit (basic)

Development: Linux, Git/GitHub, REST APIs, Flask, SQL/DBMS, Docker (basic)

SELECTED PROJECTS

LOGFLUX - Evidence-Preserving Log Pipeline | Python, WASM, Docker **| GitHub**

- Contributed backend security, integrity and APIs within a four-person team; the platform retains original log bytes and supports signed, human-reviewed parser adaptation.
- Project evidence documents 900,000 durably verified events at 15,000 events/s in a 60-second broker/evidence acceptance run, with raw-hash, Merkle and witness checks.

PARALLAX - Offline Investigation Workbench | Python, DuckDB, ML **| GitHub**

- Combines Bitcoin transaction metadata and observed network evidence into a fused graph with explainable rules, Isolation Forest ranking and analyst review.
- Preserves source hashes and audit history; exports signed case dossiers. Synthetic evaluation is distinct from operational accuracy; relay observations do not establish wallet ownership.

PROJECT AXIOM - Security Configuration Auditor | Python, Docker, SSH **| GitHub**

- Audits eight Linux configuration checks through an allowlisted Docker/SSH connector, including SSH settings, file permissions, sudo rules and account hygiene.
- Produces PASS/FAIL/UNKNOWN verdicts, prioritized remediation guidance, Markdown/JSON reports and a browser dashboard.

INDEPENDENT SECURITY PRACTICE

Self-directed | 2024 onward

Hands-on penetration testing and vulnerability assessment of web applications, CCTV cameras and DVR systems. Practiced responsible disclosure and participated in the Spribe Games Bug Bounty Program; coordinated team field work, presentations and website development.

EDUCATION

Rathinam Technical Campus | B.E., Computer and Communication Engineering | 2024-2028
Coimbatore, India | CGPA: 8.6

Dawn Matric Hr. Sec. School | HSC: 78% (2022-2024) | SSLC: 85% (2021-2022)

ACHIEVEMENTS & CERTIFICATIONS

Selected for Smart India Hackathon 2025 for an NTRO problem statement; reached final rounds in hackathons and pitch events with self-built projects.

2024: TryHackMe - Networking, Windows & Linux Fundamentals; Google - Cybersecurity & AI Fundamentals; Cisco - Networking Essentials; EC-Council - Ethical Hacking Fundamentals.
